Job Title: Research Assistant (Temporary)

This position provides an opportunity to learn about research and plant pathology. The overall goal of this research program is to improve the management of diseases of vegetable crops grown on Long Island by identifying factors favorable for disease development and evaluating various management programs for organic and conventional crop production. Almost all work will be done outside.

Job Responsibilities:

- **Main Focus:**
  - Mowing and Rototilling experiments with small scale equipment.
  - Trellising and care of tomato experiments.
- **Secondary Focus:**
  - Setting up experimental area (planting, marking plots, moving irrigation pipe, etc.).
  - Collecting Data
  - Harvesting experiments.

Qualifications:

- Must be reliable and work independently as well as with others.
- Ability to understand and implement written and oral instructions.
- Ability to work outdoors performing various types of farm and field activities.

Salary: $11.50/hr

Other:

Full time hours (39 hour work week) for this position are: Monday – Thursday 8am - 4:30pm and 8am-3:30am on Friday. Part time hours are flexible. Research begins in June and continues into fall. Starting and ending dates are flexible. Added benefits include fresh vegetables.

Closing Date: Until position is filled.
