Ryder Cup 2025

We extend our heartfelt gratitude to our dedicated staff for their flexibility during an extraordinary week of Ryder Cup activities. With a flood of fans in Farmingdale, our campus buzzed with energy. Those on-site adeptly managed heightened security, a flurry of vehicles, and even a presidential visit, showcasing remarkable patience and professionalism. A special shout out to our University Police for ensuring safety and to our Facilities Operations team for their exceptional care of our campus. Your hard work helped to make this high-profile event a success. Thank you ALL for your unwavering commitment and teamwork!

Dental Hygiene Sensory Lab Now Open for Smiles:

The Henry Schein Cares Sensory Lab provides a welcoming sensory controlled environment to soothe patients that may find the noise and activity of a traditional dental care facility challenging, helping them feel more comfortable and relaxed. It features communication software for patients who are non-verbal, portable equipment, interactive custom light effects, and more smiles!

We're falling for these upgrades!

ADA Upgrades:

The College continues to make enhancements to improve accessibility for individuals with disabilities. These upgrades, thoughtfully integrated throughout campus, strengthen our commitment to creating an inclusive environment where all students, faculty, staff, and visitors can navigate and participate fully in campus life. This initiative represents a collaborative effort across multiple departments, ensuring that accessibility improvements align with the Americans with Disabilities Act (ADA) and meet all safety and building code requirements.

Upcoming Projects:

Exciting renovations are underway at Campus Commons, which is being upgraded into a modern office space to accommodate the Human Resources and Procurement departments. The redesigned facility will blend historic character with contemporary efficiency—preserving the building's sense of place while creating a bright, functional workspace.

Upgrades include a new HVAC system, refreshed façade, metal roof with light towers, and enhanced landscaping surrounding the building. These improvements will not only support operational needs but also enhance the overall campus environment.

Let's build something great together!

Fun Facts with Ram-Bo

In 2025:
Facilities closed out
over 4,500

Hammer Time Highlight Crew in the Spotlight

This quarter's team member spotlight is on
Nick Acevedo!

Nick's commitment to improving campus operations through efficient, forward-thinking solutions is truly appreciated. He played a key role in the setup and installation of the Amazon lockers and successfully implemented a new inventory management system in Mail and Supply, both of which have enhanced efficiency and service across campus. His contributions have made a significant impact, and he continues to be a valuable asset to the Facilities team. Keep it up, Nick!!

Fire Safety Prevention Week

October 2025

The FSC community received valuable information about the importance of fire safety. The event aimed to raise awareness and promote life-saving practices through engaging educational activities.

A highlight of the day was a live-burn demonstration, which powerfully illustrated the critical role of fire and smoke alarms and fire sprinklers in saving lives during a fire emergency

Thank you to all who participated and volunteered to make this event a success!

Department Heads:

Electrical Distribution System Testing & Preventative Maintenance:

FSC is conducting critical testing and preventative maintenance on the campus's high voltage electrical infrastructure. This system provides power to every building on campus, and was built with multiple redundancies for maximum reliability. Proactively maintaining each component further minimizes the risk of power outages in the future. The work requires brief, periodic outages which are coordinated with the campus community in advance. We understand the inconvenience this may cause, and appreciate your patience as we work to keep FSC operating safely, reliably and efficiently.

FSC Sustainability Pledge

Are you interested in making sustainable changes in your everyday life, but don't know where to start? Join the sustainability community at FSC by signing the sustainability pledge! All students, faculty, staff and alumni are invited to participate. Simply click the link below to get your sustainability journey started.
