# VDI – VMware Horizon Client

To install the VMware Horizon Client, click on one of the links below depending upon your operating system.
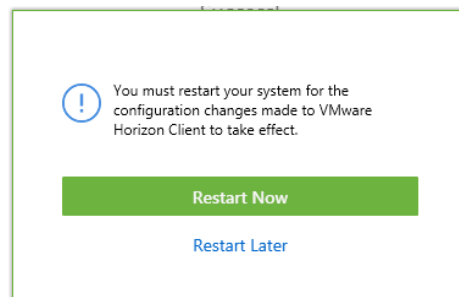

Windows: https://download3.vmware.com/software/view/viewclients/CART20FQ4/VMware-Horizon-Client-5.3.0-15208953.exe

Mac: https://download3.vmware.com/software/view/viewclients/CART20FQ4/VMware-Horizon-Client-5.3.0-15225262.dmg

You will then be prompted to Agree & Install.   Once, installed, click Finish.

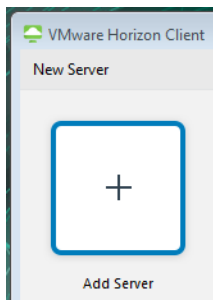

You will then see the below to restart your system for the configuration changes made to VMware Horizon Client to take effect.

   Once restarted, you will now see a VMware Horizon Client shortcut on your desktop.

To run the client, double click on the shortcut.
   You will see Add Server.

After clicking on Add Server, you will need to enter the name of the server… view.farmingdale.edu

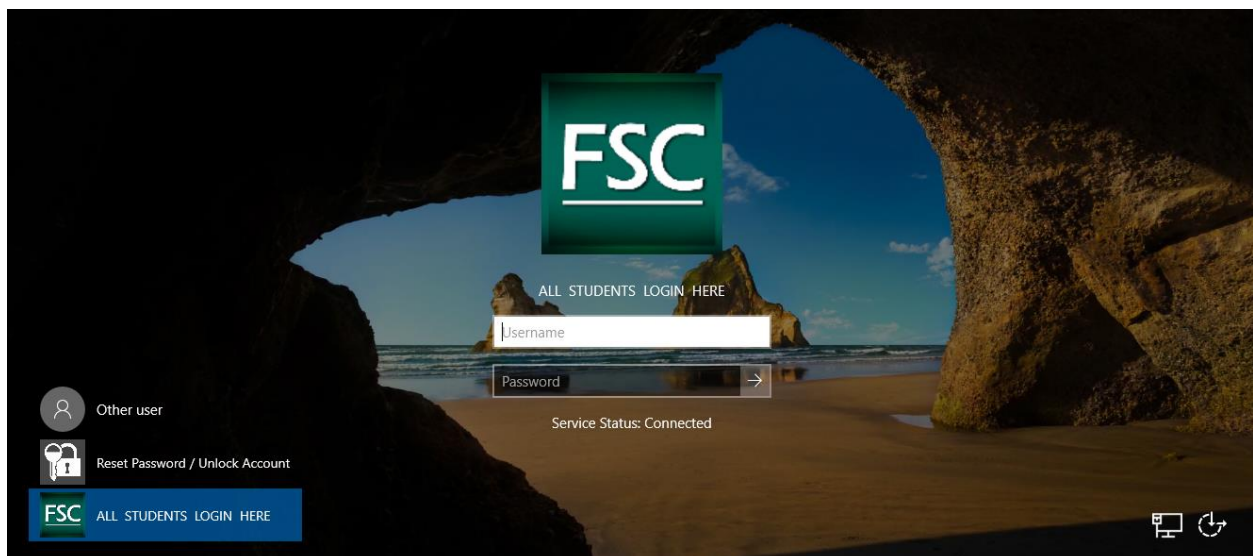

You will be prompted to enter your Farmingdale username and password.

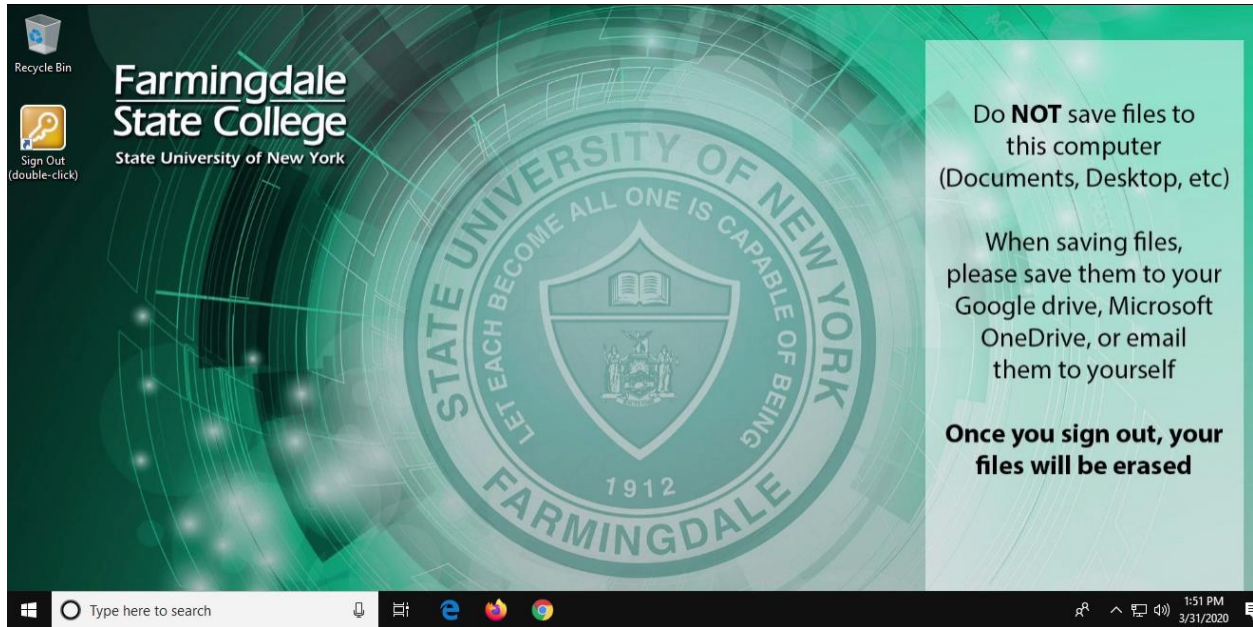

Choose the Student - Specialized Desktop.

You will then log into the VDI with your student credentials.

You will then see the Windows desktop.

When you are done, shut down like you would shut down your PC.

To log off the server, click on the plug icon.
