

2013-14 Six Months after Graduation Report

INTRODUCTION

The 2013-14 Six Months after Graduation Survey investigates occupational and educational outcomes for students who graduated in academic year 2013-14.

METHODOLOGY

The 2013-14 Six-Months after Graduation Survey includes aggregate data collected from August 2013, December 2013, and May 2014 graduates in three separate surveys each administered six months after each respective graduation. The surveys were administered online and alumni were contacted primarily via their personal email accounts. A total of 1566 graduates were sent an email invitation and 391 responded to the survey. The response rate was a significant 25%. 11% (N=44) of the respondents were August 2013 graduates, 24% (N=92) were December 2013 graduates, and 65% (N=255) were May 2014 graduates, a similar distribution to the actual graduates for 2013-14. 80% of the respondents were baccalaureate degree recipients, 17% were associate degree, and 3 percent were certificate recipients, a similar distribution to the actual graduates for 2013-14. For response rate by degree see Appendix A.
