\* Junior cohort includes students who have earned between 64 and 96 credits by census date in Fall of cohort year.

\*\* Status 2 years later is status as of Fall 2007 census date for Fall 2005 cohort, etc.

Notes: If a student earned an associates degree in 2 years, they are not counted in graduated with a different major (only counted if graduated from a different bachelor program), and if they leave the college with only an associates degree, they are counted as leaving the college without a bachelors degree.

If a student is still enrolled 2 years later, but in an associates program, they are counted as still being enrolled in a different major.
