

Low Emissions and Hybrid Vehicle Parking Permit Application

In keeping with Farmingdale State College's commitment to sustainability, parking spaces for Low Emissions and Hybrid Vehicles have been installed in front of the new LEED Certified Campus Center. Charging stations for electric vehicles have been installed in Parking Lot 5. In order to assure that these spaces are being used properly we have initiated a permit/decal process. The information requested on this form is essential in determining if your vehicle qualifies for a permit. To qualify, your vehicle must either be a hybrid or meet the LEED definition of a Low Emissions Vehicle, below.

"... vehicles that are either classified as Zero Emissions Vehicles (ZEV) by the California Air Resources Board or have achieved a minimum green score of 40 on the American Council for an Energy Efficient Economy (ACEEE). " <http://www.greencars.org>

Please complete the application and return it to University Police. If the vehicle qualifies, you will be issued a permit indicating that your vehicle qualifies for LEV/Hybrid parking. You may also be asked to produce the vehicle for inspection.
